P & C Cyberset Music 2008

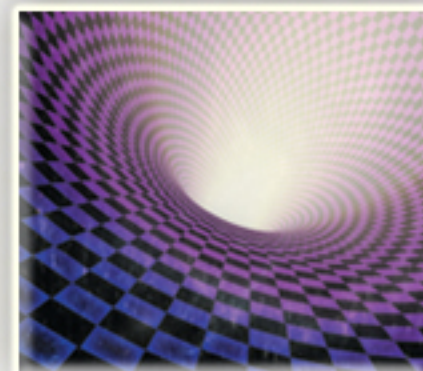

“EMC is a post electronic, post ambient and post millennial magnum opus of transcendent soundscapes. Atmospheres, guitars, electric sitars, synths and dubby grooves drenched in reverbs and cavernous echoes. EMC mixes and matches styles to create new genre fusions, it is a hypnotic and mesmerizing record.”

Artist Info:

The often elusive Mystical Sun is no stranger to success, having had over two million track downloads from his first album, followed with his 'Deeperworlds' album being 'album of the year' on many chillout radio stations and magazines in 2007 and an ever growing fan base through his years of releases on compilations for the worlds leading downtempo, dub and chillout labels. After all the accolades it is quite surprising how well Mystical Sun evolves his sound from one album to the next and yet maintains something that is uniquely 'Mystical Sun'. His past production comparisons have included 'Future Sound Of London', 'The Orb' and even 'The Cure', so it becomes hard to define what the essence of the Mystical Sun sound is.

What we do know is that his ever evolving explorations in sound design and recreation / re-molding of micro genres to suite his own ends, makes listening to a Mystical Sun album a full journey, a deep place to be, but always warm and with resolution.
